How long should a solar system last in NZ?

System size and autonomy will determine how many days of battery storage are needed - typically 1.5 to 3 days is standard for NZ homes. Inverters can be: Even the best off-grid solar systems may need support during long stretches of cloud or high demand.

Should you go off-grid in New Zealand with solar power?

Going off-grid in New Zealand with solar power represents both an exciting opportunity for energy independence, a cheaper operational cost of living, and a material contribution to sustainable energy generation. This comprehensive guide will help you understand how off-grid solar works -- and what it takes to get it right.

Are FuturaSun 380kW solar panels suitable for NZ conditions?

Look no further, SolarKing has exclusive rights to FuturaSun European designed 380kW solar panels, which are perfect for NZ conditions and come with great product warranties. Looking for Solar Racking to mount your Solar Panels - we can help with that too.

Which solar panels are best for off-grid systems?

Key things to consider: High-efficiency monocrystalline panels are the most common choice for off-grid systems due to their output and reliability. Batteries are what set off-grid systems apart. They store the solar energy you generate during the day so it's available at night or during periods of low sunlight.
