What is an emergency lighting inverter?

Emergency lighting inverters are an excellent choice for use with multiple fixtures and in cases where emergency LED drivers cannot be used, such as with integral-base lamps. Major benefit of emergency inverters is that they offer the advantage of long-distance remote installation. Here's how an emergency lighting inverter typically works:

What is a lighting inverter?

A lighting inverter is a device that converts DC battery power to standard AC voltage to provide backup for lighting systems in an emergency. It can also help protect against 'brownouts' or other voltage drops. What is an emergency lighting inverter? It provides power to your emergency lamps and fixtures in a power loss.

What is an emergency lighting backup inverter?

An emergency lighting backup inverter is a device that converts DC battery power to standard AC voltage to provide backup for various lighting systems, including fluorescent and LED lights, in an emergency.

Can a lithium ion battery be used in a central lighting inverter?

LIS provides custom VRLA and Lithium-Ion Battery Systems for Central Lighting Inverters. The lithium ion battery has not fully been recognized into the central lighting inverter market as of yet. Challenges of moving from VRLA batteries to lithium based inverters derive from the short duration runtime burst lithium ion batteries provide.

Our extensive selection of exit signs, emergency lighting units, fluorescent battery packs and emergency power systems meet the requirements for a wide range of ...
