Why should you choose a Bess energy storage system?

Designed for various applications, from off-grid power to backup solutions, our BESS helps optimise energy use, reduce costs, and improve system reliability. With scalable and flexible options, our energy storage systems offer seamless integration, ensuring a continuous, stable power supply.

Will Australia's NEM see a massive increase in battery energy storage capacity?

Australia's NEM will see a massive increase in grid-scale battery energy storage capacity in the next three years. There are 16.8 GW of battery projects that could come online in the National Electricity Market (NEM) by the end of 2027.

What is the largest battery project in Australia?

This expansion will add 700 MWh of energy storage, bringing the facility's total capacity to 700 MW/2,800 MWh, making it the largest battery project in Australia and among the largest globally.

How can Australia help energy storage grow?

There remains substantial work to be done to modernise Australia's energy rules to unlock the true potential of energy storage and allow it to fully participate in the market and bring the benefits of the technology to both the grid and consumers more broadly. Here are three ways we're helping storage grow in Australia.

The National Electricity Market (NEM) is projected to require 19GW/55GWh of dispatchable BESS storage by 2030, increasing to 42GW/170GWh by 2050, with the majority of demand focused on ...

As per sources, in February 2025, Energy Vault began construction of a 200 MW/2-hour battery energy storage system at ACEN Australia's New England Solar project, marking its first large-scale BESS ...
