This Energy Compact presents high-level commitment actions, with specific targets and timelines to drive progress towards the achievement of universal access to energy in a reliable, affordable, and ...

This is the most comprehensive and updated report on the status of renewable energy and energy efficiency in São Tomé and Príncipe, allowing an overview of current and future ...

The government of São Tome and Príncipe plans to reduce the twin-island nation's reliance on expensive oil imports by contracting a UK-based private company to deploy a 1.5-MW floating Ocean ...

Through AMP, a community in São Tomé and Príncipe will pilot the direct commissioning of 0.7 MW of solar photovoltaic capacity and 1.0 MWh of battery storage, laying the foundation for clean, reliable, ...

This article targets energy policymakers, renewable energy investors, and tech-savvy environmentalists curious about how energy storage can transform off-grid communities.

Local fishing cooperatives are already adopting solar ice-making storage units. These 15kWh systems preserve catches without grid access - a perfect example of decentralized energy solutions making ...

French energy giant TotalEnergies has started construction on a solar-plus-storage project in South Africa, with a power generation capacity of 216MW and a battery output of 75MW/500MWh.

The energy is stored in the form of air compressed by water and is released through a specifically and in-house designed hydroelectric turbine. The whole system is containerised and modular.
