The Symtech Solar Battery Energy Storage Cabinet (MEG 100kW x 215kWh) is a fully integrated, PV-ready hybrid energy storage solution designed for both on-grid and off-grid applications.

This study examines the feasibility of using combined photovoltaic (PV)/diesel/battery systems to power a remote rural school in southern Ethiopia.

In an area affected by energy insecurity and civil unrest, the new solar infrastructure offers a source of stability and support. As part of the project, 16 instructors from local polytechnic ...

Situated at over 9,000 feet in the highlands of Ethiopia, Wogagen School, meaning "The First Light of the Day", now runs on clean, reliable solar ...

In an area affected by energy insecurity and civil unrest, the new solar infrastructure offers a source of stability and support. As part of the project, ...

Installation of a mains-independent 555Wp solar system with 800AH battery storage. Power supply for more than 1000 pupils (grades 1-8) and awareness raising for more than 4000 villagers.

Thanks to Sol-Ark's advanced solar inverter systems, the school can power classrooms with projectors, computers, science labs, and vocational training equipment. The system currently ...

Situated at over 9,000 feet in the highlands of Ethiopia, Wogagen School, meaning "The First Light of the Day", now runs on clean, reliable solar energy.
