Effective communication methods in less developed regions are important for humanitarian reasons during a crisis, countering propaganda disseminated by terrorist groups, and for furthering business ...

The rooftop solar PV systems for schools will provide several benefits for Palestinian economy, contribute to and enhance the authority's plans and strategies to reduce dependence on other ...

The two main educational facilities available are located in Djermaya: a public primary school and a private school complex accommodating the primary and secondary levels.

A photovoltaic (PV) solar mini-grid has been installed in Mandelia, Chad and equipped with a distribution line that extends the reach of electricity to communities far from the main power grid.

In this paper, we use the power of artificial intelligence to ascertain and predict the presence of redundant (excess/unused) energy on a typical solar PV mini-grid in Ghana.

Kits and appliances will be provided to schools, hospitals and clinics, households and smaller businesses, in a bid to boost regular electricity access rates that currently sit at 4% in the country.

In the long term, this project will provide a sustainable and reliable ...

In the long term, this project will provide a sustainable and reliable source of energy for the Chadian electricity distribution network. Subsequently, this increases high-speed internet access ...
