Why should you choose Shield for your outdoor telecom enclosure?

This solution is also ideal for rapid deployment at the network edge. SHIELD offers a wide range of customization features for your outdoor telecom enclosures such as machining, special dimensions, custom colors, and additional protection for harsh environment.

How do I choose a telecommunications enclosure?

Proper installation of telecommunications enclosures is essential to their performance and longevity. Select an appropriate site that meets environmental and logistical needs, whether indoors or outdoors.

Where can cube outdoor enclosures be used?

Cell towers, business parks, campuses, data centers, strip malls, sports stadiums, oil fields, wind farms, solar fields, lift stations, utility sub stations and traffic systems all rely on our expansive line of industry-leading CUBE outdoor enclosures. As connectivity skyrockets, so does the cost of service interruptions.

Why do telecommunications enclosures need to be installed properly?

As previously mentioned, the materials determine the longevity and durability of the enclosure by providing safety from environmental factors and security from theft. Proper installation of telecommunications enclosures is essential to their performance and longevity.

Charles Universal Broadband Enclosures (CUBE) are constructed to withstand the elements and provide superior protection for active electronics in all environments.
