Will Italy support a centralised electricity storage system?

The European Commission has approved, under EU State aid rules a EUR17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system.

Are our storage systems compatible with all photovoltaic systems?

Our storage systems are compatible with all new or existing photovoltaic systems also in "Conto Energia". The cabinet manufactured by us for all types of system allows the increase of storage capacity over time by inserting "rack modules". Our storage systems are fully integrated and have reduced dimensions and weights.

What does the European Commission say about energy storage?

The Commission adopted in March 2023 a list of recommendations to ensure greater deployment of energy storage, accompanied by a Staff Working Document, providing an outlook of the EU's current regulatory, market, and financing framework for storage and identifies barriers, opportunities and best practices for its development and deployment.

Our "all in one" storage systems are developed and manufactured in Italy and use all high efficiency materials. The strict quality controls guarantee a long service life and a high reliability of the ...

Our "all in one" storage systems are developed and manufactured in Italy and use all high efficiency materials. The strict quality controls guarantee a long service life and a high ...

The advantage of the cloud energy storage model is that it provides an information bridge for both energy storage devices and the distribution grid without breaking industry barriers and improves ...

The European Commission has approved, under EU State aid rules a EUR17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system.

With regions like Lombardy leading at 1,454 MWh of deployed storage, the country isn't just adopting batteries--it's rewriting Europe's energy playbook. But why should you care?

By 2030, the country is targeting 28GW of wind power and nearly 80GW of solar capacity, making energy storage essential for ensuring grid stability and maximizing renewable integration. ...
