What are the challenges of procurement for utility-side storage & solar-plus projects?

The challenges of procurement for utility-side storage and solar-plus projects center largely on early-stage decisions: defining the top-priority use case, but also exploring ways to get more value out of the project and to prepare for market changes over its life.

What is solar-plus for Electric Co-ops?

Solar-Plus for Electric Co-ops (SPECs) was launched to help optimize the planning, procurement, and operations of battery storage and solar-plus-storage for electric cooperatives. SPECs was selected by the U.S. Department of Energy's National Renewable Energy Laboratory (NREL) for Round 2 of the Solar Energy Innovation Network (SEIN).

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

What is a solar RFP?

A Request for Proposal (RFP) is a formal bid document to ask vendors to provide proposals for desired projects, as required by many public agencies (federal, state, local). A solar RFP outlines the photovoltaic (PV) product or service requirements, the contract terms, and the bidding process.

Bid on readily available Energy Storage contracts with the best and most comprehensive government procurement platform, since 2002. Bidding for Energy Storage ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

Favorable contract terms and conditions negotiated by SPURR's expert staff. Access to transparent, publicly available pricing and terms so that estimated project returns on ...

This presentation, from a SPECs workshop on summarizes concerns and potential solutions for storage and solar-plus-storage project planners, pertaining to contractual energy storage service agreements.

There are three key types of procurement contracts--power purchase agreements (PPAs) or energy storage
