-----

State-owned power company China Datang Corporation put a 100-MWh energy storage station using sodium-ion batteries into operation in central ...

Chinese energy storage and portable power system maker Bluetti has unveiled what it calls the "world's first" sodium-ion portable power station. ...

July 12, 2024: The first phase of China's state-owned Datang Group's new energy storage power station has been connected to the grid in Qianjiang, Hubei ...

China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh project in ...

Different from the conventional electrochemical energy storage power station, the power station uses a new self-developed large-capacity sodium-ion battery energy storage technology, ...

The most significant impact of sodium-ion technology may be not on our roads but on our power grids. Storing clean energy generated by solar and wind has long been a challenge. Sodium ...

This project opened on June 30, 2024, with battery cells supplied by Zhongke Haina, making it the largest sodium-ion battery energy storage system in the world.

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online.
