---

Specializing in island microgrid solutions since 2010, we've deployed 23 solar-storage projects across the Pacific. Our modular systems withstand harsh marine environments while maintaining 94.7% ...

Since inception, LS Power has developed or acquired 47,000 MW of power generation, including utility-scale solar, wind, hydro, battery energy storage, and natural gas-fired facilities.

The main objective of the utility-scale energy storage project is to bring together researchers from science and engineering to develop proof-of-concept energy storage solutions that are suitable ...

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy ...

On September 8, 2024, the GSL ENERGY 60kwh wall-mounted battery home energy storage system was successfully deployed in Guatemala, bringing new changes to the local household ...

The main objective of the utility-scale energy storage project is to bring together researchers from science and engineering to develop proof-of-concept energy storage solutions that are suitable for ...

Energy storage battery containers offer a scalable, renewable-driven solution to stabilize grids and reduce carbon footprints. This article explores how these systems work, their benefits for Kiribati, and ...

That's Kiribati's reality - 33 coral atolls facing energy poverty and climate threats simultaneously. With 70% of urban households experiencing daily blackouts during peak hours, the urgency ...
