-----

After eight years of intensive planning, countless discussions, and unwavering commitment from many partners, we have signed the agreement with the Government of Guinea for ...

Guinea plans to build the country's first solar power plants to increase its electricity production by 15% and cut its reliance on West African ...

In Guinea, a country grappling with significant energy challenges, two towns are making strides towards sustainable development with the recent inauguration of solar photovoltaic (PV) mini ...

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to decarbonise its ...

Guinea has launched a major solar power project to bring clean energy to 72 rural communities and install solar streetlights across 20 urban areas. Supported by the World Bank, this ...

The project will electrify the cities of Kankan and Siguiri with clean and highly cost-effective energy from two 42 MW solar power plants - a massive boost to power reliability and sustainability alike.

The Koumaguéli Solar Power Station is a 40 MW (54,000 hp) solar power plant under development in Guinea. When completed, it is expected to be the largest grid-connected, privately funded solar ...

Guinea is also a country blessed with enough sunshine to be a suitable place to build grid-connected solar power plants, and many developers have offered to be the first to do so.
