If smart charging approaches are utilized, the introduction of electric vehicles in Saint Lucia can benefit both LUCELEC and the electricity grid by providing additional storage resources and increasing total ...

Like the rest of the Caribbean, St. Lucia finds itself needing to establish improved construction standards that correspond to Category 5 hurricane wind loads. The project aims to prepare, develop, and de ...

classes (for comparison). Onshore wind: Potential wind power density (W/m²) is shown in the seven classes used by NREL, measured at a height of 100m. The bar chart shows the distribution of the ...

The Action Plan outlines Saint Lucia's strategy to transition to a low-carbon energy sector by 2030, aiming for 50% renewable energy in electricity generation and a 7% reduction in ...

Does local use of wind and solar power affect the consumption of renewable power? However, the sub-effect of the local use of wind and solar power was found to have an inhibitory effect, indicating that ...

As the first generation asset outside of the main diesel plant at Cul de Sac, this new project begins to mitigate natural disaster and security risks from ...

How much can new technologies such as solar photovoltaics or geothermal energy generation stabilize and reduce costs while advancing Saint Lucia's goals to reduce greenhouse gas emissions? Do ...

With abundant geothermal, wind, and solar resources to more than meet Saint Lucia's peak demand, even partial development of these resources could result in high penetration of renewables onto the ...
