---

Tunisia has awarded French renewable energy company Voltalia a contract to develop a 132-megawatt solar power project to boost electricity supply in the country.

In 2010, Tunisia launched the Prosol Elec program to promote the installation of solar panels on roofs connected to the low-voltage grid through subsidies and loans.

The Government of Tunisia is taking steps to diversify its energy generation mix by bringing on hydropower and solar energy.

The bottom right of the map lists announced solar projects where final locations have yet to be confirmed. An inset provides greater detail for the area around Tunis. Existing ...

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together ...

These projects stem from a 2018 international call for tenders issued by the Ministry of Industry, Mines, and Energy, targeting the development of 500 ...

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about ...

Located in the Kairouan governorate of northeastern Tunisia, the project is expected to generate approximately 222 GWh of electricity annually, enough to power around 43,000 homes.
