---

Türkiye has raised its 2035 renewable energy target to 120 gigawatts of combined solar and wind capacity, up from an earlier goal of 53 gigawatts for ...

“By doubling its solar energy capacity in just two and a half years and surpassing its 2025 target ahead of schedule, Türkiye has demonstrated its ...

Planned investments in diverse solar projects, including rooftop, storage-integrated, floating, and hybrid systems, are expected to maintain this ...

OverviewBackgroundPolicies and lawsEconomicsHeating and hot waterPhotovoltaicsAlternatives to photovoltaicsFurther readingSolar power suits Türkiye's climate, especially in the South Eastern Anatolia and Mediterranean regions. Solar power is a growing part of renewable energy in the country, with almost 25 gigawatts (GW) of solar panels in 2025, of which 22 GW is commercial and industry rather than traditional power companies or residential rooftop solar as in many other countries. It generates 6% of the country's electricity. Solar thermal

Solar power is a growing part of renewable energy in the country, with almost 25 gigawatts (GW) of solar panels in 2025, of which 22 GW is commercial and industry rather than traditional power companies ...

“By doubling its solar energy capacity in just two and a half years and surpassing its 2025 target ahead of schedule, Türkiye has demonstrated its potential to set more ambitious goals,” ...

Analysts project the unlicensed solar segment to reach 40 GW by 2030, provided grid infrastructure keeps pace. Türkiye's solar irradiance ...

Türkiye's solar power capacity reached over 19 GW in just two ...
