How deep should a 1000mm cabinet be?

A 1000mm deep cabinet may have a max internal depth of 870mm. The internal depth you need should also take into account cable radius bend. Rack Width: decide if you need a 600mm or 800mm wide rack. 600mm is the standard for a 19inch server rack. 800mm provide extra width for cable management and air flow.

What is a 12U rack & data cabinet?

The 12U racks and data cabinets range from Server Room Environments covers standard rack mount IT applications for use in office, retail and warehouse environments to cabinets designed for extreme conditions and roadside enclosure protection.

What size cabinets are available?

The cabinets range in depth size from 400mm to 1200mm and include IP20 and IP54 cabinets, free standing and wall mounted options. Standard colour options include black and grey powder coat finishes with options to paint in client specific colours and finishes. When selecting a rack or cabinet there are several factors to consider.

How do I choose a 12U rack or cabinet?

When selecting a rack or cabinet there are several factors to consider. A 12U rack or cabinet can house equipment whose total height when placed into the rack is no more than 0.53m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device.
