What equipment is needed in a telecommunications room?

Room for maintenance of ATC equipment. Locate adjacent to the IFR Equipment Room with direct access to the Telecommunications Room. Snorkel-type localized stand-alone exhaust system, as required. As required for maintenance equipment, include grounding per FAA Standard. TVSS required on the panel feeding this room.

What is a radar & communication room?

Radar, Communication, and Telecommunications Rooms. These spaces house solid state electronic equipment and require complete heating and air conditioning. Cooling and humidity control is required for reliable equipment operation and cooling loads are generally constant, 24 hours per day, except during additions or equipment modifications.

What are the connectivity requirements for RACF IFR equipment room?

4-3.8.3 AOB to RACF Connectivity. Connectivity between the RACF IFR Equipment Room and the AOB Operations-Airfield Management/Flight Planning Room is required. This and any additional connectivity requirements should be addressed during the planning/DD 1391 development phase. Safety and Security.

What are airport geometric design standards?

These standards include such minimum separation distances as those between a runway centerline and aircraft parking aprons, buildings, and those between a taxiway centerline and fixed/movable objects, etc. Refer to AC 150/5300-13, Airport Design, for information on FAA airport geometric design standards. Imaginary surfaces and airspace.

This page provides a quick reference to engineering, design, and construction standards for various airport-related equipment, facilities, and structures. Visit our Series 150 Advisory Circular ...

Equipment mounting channels will be 3" deep and punched on the front and rear flange with the EIA-310-D Universal hole pattern to provide 45 rack-mount spaces for equipment. Each mounting space ...

Customized cabinets for indoor and outdoor applications like Micro ODF, Mini ODF, ONU Cabinets, IP Graded Air-Conditioned cabinets.

The material in this AC is independent from guidance on Airport Improvement Program (AIP) or Passenger Facility Charge (PFC) eligibility and justification. Use of this AC does not establish ...
