In 1938, with the development of the Gaiselberg oil field, the oil discovery that made the small town of Zistersdorf the epitome of the oil wealth of the Vienna Basin, took place. The oil-bearing layers of the Gaiselberg field, located almost one kilometer south-west of Zistersdorf, cover an area of only about 2.5 km&#178;, but along a geological fracture (the so-called Steinbergbruch) there are a number of oil-bearing layers one above the other, whose depth ranges from 800 m to almost 2,400 m.
