What is a 200KW / 800V DC/DC power converter cabinet?

The unit is a non-isolated bidirectional 200kW / 800V DC/DC power converter cabinet solution. Flexible design and application with its 800 Vdc maximum voltage on the high voltage side and up to 400 Adc maximum current. Moreover, several cabinets can be enabled to work in parallel. This functionality is available per client request.

What is an energy storage inverter?

The inverter is optimized to meet the needs of the most demanding energy storage applications including demand charge reduction, power quality, load shifting, and ancillary grid support services such as frequency response and voltage support.

What is a compact inverter system?

INVERTRONIC compact inverter systems and their racks, comprising hot-swapping 1/5 19" rack modules with a range of 3 heights, are characterised by their modular architecture. Electronic bypass switch assures system availability, enables interruption-free switching and is available in two power ratings.

What types of inverter modules are available?

The inverter modules are available for various input and output voltages, and the output power varies according to the voltage combination. INVERTRONIC compact inverter systems and their racks, comprising hot-swapping 1/5 19" rack modules with a range of 3 heights, are characterised by their modular architecture.
