Today, most of Kosovo's electricity is supplied as imports or from two lignite-fired thermal power plants, the 40-year-old Kosovo A Power Station ...

Fast forward to 2025, and the country is rewriting its energy script, one lithium-ion cell at a time. While Kosovo doesn't yet have homegrown Tesla-like giants, its storage landscape is buzzing ...

Renewables plus battery storage: The launch last year of Kosovo's first large-scale wind and solar power projects revealed the first performance data for such projects.

The Kosovo Independent Energy Storage Power Station represents a transformative step toward balancing these goals. By 2023, Kosovo's renewable energy capacity grew by 18%, yet grid ...

March 2023, Kosovo's new energy strategy included plans to refurbish both units of Kosovo B power station, in addition to at least one unit of Kosovo A power station by 2024. ...

To create a secure energy sector focused on citizens, with the solar auction aligning with these goals. A foundation for a new, competitive, and sustainable energy sector in Kosovo.

We've been working on containerized storage units that combine second-life EV batteries with advanced thermal management. Our pilot in neighboring Albania achieved 92% round-trip efficiency - not bad, ...

The MCC-Kosovo Compact seeks to introduce a state-of-the-art energy storage system, laying the foundation for reliable, renewable energy sources to be integrated into Kosovo's grid and reducing ...
