Can a defibrillator cabinet be solar powered?

The manufacturer has spent 2 years working with leading universities across the UK to develop a truly self-powered defibrillator cabinet. Although we initially desired an exclusively solar-powered cabinet it quickly became apparent that in the winter the UK does not receive enough sunlight to power a heating system.

Will a solar-powered heating cabinet work all year round?

Although we initially desired an exclusively solar-powered cabinet it quickly became apparent that in the winter the UK does not receive enough sunlight to power a heating system. Therefore, the addition of a wind turbine ensures that the cabinet will work all year round.

How do I install a solar & wind powered defibrillator cabinet?

Before installation, you need to cast a concrete base for the complete solar and wind powered defibrillator cabinet and set a sub-frame in the concrete for the cabinet to bolt down to. All fixings are securely housed within the battery compartment, ensuring that there are no accessible external fixings.

It is believed that in the foreseeable future, there will be an increase in the implementation of solar energy on medical equipment, enhancing healthcare accessibility and improving quality of life.

Self-powered defibrillator cabinet with wind & solar heating, marine-grade lock, remote monitoring option, storm-resistant turbine. Ideal for remote locations.

Solar-powered medical supplies represent a significant advancement in healthcare reliability and accessibility. By harnessing the sun's ...
