What are Jordan's energy storage technologies?

Energy Storage Technologies: Jordan is exploring energy storage solutions, particularly pumped-storage hydropower (PSH), with intention to establish a storage project at Al-Mujib dam before 2030. This may also present opportunities for the U.S. energy sector.

What is going on with electricity in Jordan?

Electrical energy exchange with Egypt has been ongoing, contributing to the stabilization of the Jordanian electrical network. Agreements have been reached to increase the export capacity of the Jericho area, and negotiations for electricity supply contracts to Iraq are in progress.

How much energy will Jordan need in 2040?

According to the Ministry, electricity demand should grow by an average of 6.5%/year until 2030, to 52 TWh. The country's overall capacity should reach 8 GW in 2030 and 14 GW in 2040 (intermediate scenario). The Jordan energy market report provides expert analysis of the energy market situation in Jordan.

How will energy prices change in Jordan in 2022?

Electricity prices for households have risen by 27% in 2022 and diesel prices by 17%. The country's energy consumption has decreased by 2.5%/year since 2017. Oil supplies half of the total consumption. Electricity demand should grow by an average of 6.5%/year until 2030. Jordan will develop 600 MW of solar PV through the Prosperity Green project.

Electricity prices remained steady in 2024, while diesel prices dropped by 9%. The transport and residential sectors each account for 43% of consumption, with industry at 12%.

The Jordan energy market report provides expert analysis of the energy market situation in Jordan. The report includes energy updated data and graphs around all the energy sectors in Jordan.

Huijue Group offers industrial and commercial energy storage, PV-BESS -EV Charging, Off-grid / On-grid Microgrid, telecom site solutions, and home solar energy storage, ensuring ...

The energy sector in Jordan has encountered two significant challenges in its energy supplies. The first involved the suspension of oil supply to Jordan at preferential prices from Iraq after 2003.

Flat tiered tariffs and net-metering structurally don't allow storage investment recovery. When will the
