Are US energy officials reassessing risk posed by Chinese-made solar inverters?

The news agency claims US energy officials are reassessing the risk posed by Chinese-made devices according to two unnamed sources. This follows discovery of rogue communication devices not listed in product documents in some Chinese solar inverters, according to Reuters. The number of devices investigated was also not disclosed.

Are inverters made in Korea?

Inverters include remote access capabilities to enable updates and maintenance, and they are also used in a range of appliances, including wind turbines, batteries, heat pumps and vehicle chargers. Up to 95 percent of inverters available in Korea are made in China, but they are shipped to Korea and sold under the brands of domestic companies.

Are Chinese solar power inverters Rogue?

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S. experts who strip down equipment hooked up to grids to check for security issues, the two people said.

Why were solar power inverters disabled from China?

In November, solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing concern among government officials, three people familiar with the matter said.
