Who is Nordic batteries?

At Nordic Batteries we assemble and manufacture customized battery- and energy storage solutionsto drive your business forward. Based on our market and technological expertise we deliver solutions powering the green shift for key industries. High energy battery module produced in Norway from norwegian battery cells.

How can batteries help the Nordic energy grid?

Support for intermittent renewables: With the increasing share of solar and wind power in the Nordic energy mix,batteries can store excess energy generated during peak production times and release it when renewable generation is low,further enhancing grid stability.

Why is the Nordic region a key energy storage provider?

With existing interconnections to the UK,Germany,the Netherlands,Poland, and the Baltics,the Nordic region already serves as a key energy storage provider for the rest of Europe. Many Nordic hydropower plants are upgrading their control systems to improve its responsiveness.

How many hours a day are high electricity prices in Nordic countries?

oAverage of 90 hoursin Nordic countries in 2023 simultaneously,the number of hours with high electricity prices has risen significantly. Before 2021,there were only a few hours with prices exceeding 200 EUR/MWh,but these became much more frequent during 2021 and 2022 due to the energy crisis.

Explore EV charger wholesale options--bulk supply, competitive pricing, and one-stop solutions for resellers, installers, and fleet operators.

The pricing mechanism significantly affects energy storage, as it determines the revenue that energy storage operators can earn by discharging during high-price periods and charging during ...
