What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

Is a 100% renewable Seychelles power supply possible?

The study 'A 100% Renewable Seychelles' (Hohmeyer, 2016) indicates that a power supply solely from renewable sources is technically feasible. With regards to the three islands, Mahé; as the main island enjoys the service of a reliable electricity system, which services practically every citizen and has very few downtimes.

How many wind turbines are there in the Seychelles?

Masdar developed and delivered the first large-scale renewable energy project in the Seychelles. Owned and operated by the Seychelles government, the project consists of eight wind turbines across two small islands off the coast of Mahe - five turbines on Romainville Island and three at Ile du Port.

How is the Seychelles energy project financed?

The project is a major step toward meeting the Seychelles' target of producing 15 percent of its energy from renewable sources by 2030. It was financed through a grant of US\$28 million from the Abu Dhabi Fund for Development, a government entity that enhances living standards in developing nations.

Recent solar and battery storage projects have helped some of the Seychelles' outer islands reduce their reliance on diesel from 100% to around 20%, which is a significant ...

We are committed to excellence in solar power plants and energy storage solutions. With complete control over our manufacturing process, we ensure the highest quality standards in ...

Recent solar and battery storage projects have helped some of the Seychelles' outer islands reduce their reliance on diesel from 100% to around 20%, which is a significant milestone for ...

In fact, the Government of Seychelles (GoS) is actively exploring opportunities to embark on a 100% renewable energy supply pathway. The article hence discusses the feasibility of such a ...
